Who We Are

Alanté is an integrated healthcare solution for physicians, physician specialists, and group practices. We are experts at managing chronically ill patients to ensure they receive the best care while avoiding unnecessary costs. We integrate with your systems to ensure continuity of your patient's health information, helping to ensure you have the most up-to-date information for your patients. The patient experience and enhancement of the physician/patient relationship are at the heart of our service. We will help improve your quality measures.

Alanté® improves communication, coordination, and care in the comfort of the patient's home.

What is CCM?

Chronic Care Management (CCM) is a preventative program designed by Medicare to offer patient-specific support through 20-minutes or more of non-face-to-face care coordination services each month. CCM addresses and manages patients' chronic conditions before they worsen, improving health outcomes and saving costs towards avoidable hospital and ED visits.

Who Qualifies for CCM?

Patients need to have two or more chronic conditions to qualify for CCM. A chronic condition is a condition that: is expected to last at least 12 months or until the death of the patient and places the patient at significant risk of death, acute exacerbation decompensation, or functional decline.

Our Process

The Alanté Health Patient Care Team is comprised of care coordinators who function as an extension of the provider. We manage all aspects of the CCM process for you using our dedicated eligibility and enrollment team. This includes screening and contacting the patient, obtaining consent, developing their person-centered electronic care plan, and ensuring everything is available and shared timely within and outside the billing practice to individuals involved in the patient's care. We are available 24/7/365 to assist patients with their care plan as well as coordinating medical and physician orders and follow-up appointments in your office.

Provider Benefits

- **Improved provider/patient relationships**
- **Greater convenience via telehealth visits**
- **Better adherence to physician in clinic visits**
- **Decreased costs of care**
- **Accurate billing for CCM related codes**
- **Improved metrics for CMS reporting**
- **Assistance in managing complex patients**
- **Improved patient medical profile**

Patient Benefits

- **Improved quality of life**
- **Centralized healthcare records**
- **Optimized communication between providers, patients, & their families**
- **More convenience for provider and patient**
- **Higher quality patient-centered care**
- **Reduction in healthcare costs**
